Vedsai Vangapandu

Data Analyst | Research Assistant | Business Analytics Student

vedcmpt@gmail.com | +17807293150 | Edmonton, AB, Canada | linkedin.com/in/ved-cmpt | github.com/ved-cmpt

Profile

Computer Science student with experience in data cleaning, validation, documentation, dashboard reporting, and stakeholder support. Skilled in Python, SQL, Excel, Power BI, and Google Workspace, with experience organizing fragmented datasets, identifying inconsistencies, and preparing clear reports for non-technical audiences. Interested in ERP readiness, supply chain data quality, inventory accuracy, and process improvement.

Professional Experience

Research Assistant - Multiple Data & Digital Research Projects Nov 2025 – Present | Edmonton AB
MacEwan University
- Supporting three concurrent research projects across World Bank, CPSC, and Accounting-focused data analysis work, with responsibilities in data cleaning, validation, documentation, and reporting.
- Cleaned, structured, and validated datasets using Python, R, Excel, and Google Workspace.
- Identified missing values, inconsistent records, data gaps, and quality issues to improve analysis reliability.
- Used APIs and Python workflows to support automated data extraction and reduce manual processing.
- Authored technical documentation, methodology notes, and reports to support reproducibility and stakeholder review.
- Improved research workflow efficiency by 50% through better file organization, validation steps, and documentation practices.

Research Assistant & Product Designer Sep 2025 – Present | Edmonton AB
MacEwan University
- Translated academic research into structured user flows, design documentation, and 100+ Figma screens.
- Designed and iterated multiple prototype versions while maintaining organized files, assets, and project documentation.
- Co-authored and submitted an HCI research paper accepted for an international research conference.
- Collaborated with researchers and project partners to align design outputs with research goals and stakeholder needs.

Student Tutor Jan 2026 – Present | Edmonton AB
kihêw waciston Indigenous Centre, MacEwan University
- Explained technical and quantitative concepts in simple, structured ways for students.
- Supported students with analytical coursework, digital platforms, and academic organization.
- Helped organize learning materials and workflows using Google Workspace.
- Worked with staff and tutors to provide reliable, student-centered academic support.

Projects

Data Quality & Dashboard Analysis - Student Cost of Living Dataset
Python (Pandas), Microsoft Excel, Power BI
- Cleaned and combined fragmented public datasets including tuition, transit, rental, and cost-of-living data to support structured analysis.
- Used Excel and Python to organize categories, validate inconsistent values, and prepare data for dashboard reporting.
- Built a Power BI dashboard to summarize key cost drivers and communicate findings to non-technical stakeholders.
- Documented data sources, assumptions, limitations, and methodology to support transparent and reproducible reporting.

Qualitative Data Review & Issue Categorization
Excel, Python (NLTK/Text Mining), PowerPoint
- Reviewed and categorized 150+ student feedback entries to identify recurring service issues, operational concerns, and improvement themes.
- Organized feedback by theme, urgency, and issue type to support clearer reporting and prioritization.
- Maintained ethical data handling by anonymizing qualitative data and removing identifying details.
- Summarized findings into clear recommendations for non-technical stakeholders.

Survey Data Design & Validation Project
Qualtrics/SurveyMonkey, R/Python, Excel
- Designed a 15-question survey using branching and skip logic to collect structured student satisfaction data.
- Validated survey responses and organized data for subgroup analysis across academic year and stress-related variables.
- Used Python and Excel to identify patterns, compare respondent groups, and summarize key findings.

- Drafted methodology and limitations documentation outlining data cleaning steps, bias reduction, and privacy standards.

Education

MacEwan University 2027 | Edmonton AB

Bachelor of Science - Computer Science

Minors: Cybersecurity, Marketing

Relevant Coursework: File & Database Management, Practical Programming Methodology, Software Engineering, Data Structures & Algorithms, Human-Computer Interaction, Consumer Behaviour, Digital Marketing

Skills

- **Data Analysis & Validation:** Data Cleaning, Data Validation, Data Quality Review, Missing Data Checks, Duplicate Detection, Statistical Analysis, Mixed-Method Analysis
- **Tools & Programming:** Python, Pandas, NumPy, R, SQL, Microsoft Excel, Pivot Tables, Power BI, Tableau, Google Workspace, GitHub
- **Documentation & Reporting:** Technical Documentation, Methodology Notes, Dashboard Reporting, Data Storytelling, Stakeholder Reports, Reproducible Analysis
- **Business & Process Support:** Process Improvement, Operational Issue Tracking, Stakeholder Communication, Attention to Detail, Cross-Functional Collaboration

Organizations

Director of Events, MacEwan Data Analytics Club Oct 2025 | Edmonton AB

MacEwan University

- Coordinated event schedules, logistics, speaker sessions, and technical setup for club activities.
- Worked with executive members to prepare materials and ensure events ran smoothly.

Student Volunteer Jan 2026 | Edmonton AB

MacEwan International Badminton Club

- Supported weekly club setup, equipment organization, and student engagement.
- Helped maintain an organized and welcoming environment for club members.
